of Dry and Dried Produce****Sixty-second session**

Izmir, Turkey, 29 June – 3 July 2015

Item 4 (b) of the provisional agenda

**Review of existing UNECE Standards
and alignment with the 2011 Standard Layout**

**Revised draft Standard for Inshell Pistachios (proposal by
the delegation of the United States of America)***

The following revised recommendation for inshell pistachio nuts was submitted by the delegation of the United States of America.

I. Definition of produce

This standard applies to inshell pistachio nuts free from outer husks, of varieties (cultivars) grown from Pistachio (*Pistacia vera* L.) intended for direct consumption or for food when intended to be mixed with other products for direct consumption without further processing. This Standard does not apply to inshell pistachio nuts that are processed by salting, sugaring, flavouring, or roasting or for industrial processing.

II. Provisions concerning quality

The purpose of the standard is to define the quality requirements of inshell pistachios at the export control stage, after preparation and packaging.

However, if applied at stages following export, the holder shall be responsible for observing the requirements of the standard. The holder/seller of products not in conformity with this standard may not display such products or offer them for sale, or deliver or market them in any other manner.

* This document was submitted after the ten-week deadline to include proposed revisions of the Rapporteur.

A. Minimum requirements

In all classes, subject to the special provisions for each class and the tolerances allowed, inshell pistachio nuts must display the following characteristics:

The shell must be:

- Intact; however, slight superficial damage and partially open pistachio nuts are not considered as a defect provided the kernel is physically protected
- Clean; practically free of any visible foreign matter including residues of adhering husk or dirt affecting in aggregate more than 10.0 per cent of the total shell surface;
- Free from blemishes, areas of discoloration or spread stains in pronounced contrast with the rest of the shell affecting in aggregate more than 20.0 per cent of the surface of the shell;

The shells of inshell pistachio nuts must show no trace of hulling.

The kernel must be:

- Free from rancidity;
- Sufficiently developed;
- Free from blemishes, areas of discoloration or spread stains in pronounced contrast with the rest of the kernel affecting in aggregate more than [25.] per cent of the surface of the kernel;

The whole produce (shell and kernel) must be:

- Sound; produce affected by rotting or deterioration such as to make it unfit for consumption is excluded;
- Free from mould filaments visible to the naked eye;
- Free from living pests whatever their stage of development;
- Free from damage caused by pests including the presence of dead insects and/or mites, their debris or excreta;
- Free of abnormal external moisture;
- Free of foreign smell and/or taste.

The condition of the inshell pistachio nuts should be such as to enable them:

- To withstand transportation and handling
- To arrive in satisfactory condition at the place of destination.

B. Moisture content ¹

Inshell pistachio nuts shall have a moisture content not exceeding 6.5 per cent².

¹ Reservation by the Netherlands and the United Kingdom for a maximum level of 6.0 per cent moisture.

² The moisture content is determined by one of the methods given in Annex II of the Standard Layout – determination of Moisture content for dry produce (nuts) – http://www.unece.org/fileadmin/DAM/trade/agr/standard/dry/StandardLayout/StandardLayoutDDP_e.pdf . The laboratory reference method shall be used in cases of dispute.

C. Classification

In accordance with the defects allowed in Section “IV Provisions Concerning Tolerances” Inshell pistachio nuts are classified into the following classes:

“Extra” Class, Class I and Class II.

The defects allowed must not affect the general appearance of the produce as regards quality, keeping quality and presentation in the package.

III. Provisions concerning sizing

Sizing is mandatory for Extra Class and Class I and optional for Class II.

Size is determined by the number of Inshell pistachio nuts per ounce or per 100 grams according to the following table:

Number of pistachio nuts per ounce	Number of pistachio nut per 100 grams
Less than 20	Less than 71
20-24	71-85
24-28	85-99
28-32	99-113
More than 32	More than 113

Broken nuts and blanks or empty nuts shall not be used in determining counts.

When sized, inshell pistachio nuts shall be fairly uniform size. It means that, in a representative sample, the weight of 10 per cent, by count, of the largest pistachio nuts shall not exceed 1.50 times the weight of 10 per cent, by count, of the smallest pistachio nuts.

Screened (or weighed) inshell pistachio nuts mean inshell pistachio nuts whose number is over or under a stated figure per ounce or per 100 grams.

IV. Provisions concerning tolerances

Tolerances in respect of quality and size shall be allowed in each lot for produce not satisfying the requirements of the class indicated.

A. Quality tolerances

<i>Defects allowed</i> ³	<i>Tolerances allowed Per centage of defective fruit by count</i>		
	<i>Extra</i>	<i>Class I</i>	<i>Class II</i>
(a) Total tolerances for shells no satisfying the minimum requirements, of which no more than:	5	10	15

³ Standard definitions of terms and defects are listed in the Annex of this document.

<i>Defects allowed</i> ³	<i>Tolerances allowed Per centage of defective fruit by count</i>		
	<i>Extra</i>	<i>Class I</i>	<i>Class II</i>
Dark, stained shells ^a	2	3	4
cracks and laterally split shells	3	6	10 ^b
adhering hull and blemishes	1	4	5
unsplit shells	2	3	5
(b) Total tolerances for kernels not satisfying the minimum requirements,	3	6	12
not fully developed, shrivelled and stained kernels	3	6	10
rancid, decay, having a foreign smell or taste, damaged by pests	1	2	3
mould	0,5	0,5	1
empty nuts	1	3	5
living pests	0	0	0
(c) For produce not conforming to the size indicated, in total	10	10	10

^a These tolerances would not count toward the total tolerances.

^b In Class "II", when the marking indicates "mechanically opened" pistachios or nuts, this tolerance is increased to 20 per cent.

V. Provisions concerning presentation

A. Uniformity

The contents of each package must be uniform and contain only Inshell pistachio nuts of the same origin, quality, [crop year- optional], size (if sized) and variety or commercial type (if indicated).

The visible part of the contents of the package must be representative of its entire contents.

B. Packaging

Inshell pistachio nuts must be packed in such a way as to protect the produce properly.

The materials used inside the package must be clean and of a quality so as to avoid causing any external or internal damage to the produce. The use of materials, particularly of paper and stamps bearing trade specifications, is allowed, provided the printing or labelling has been done with non-toxic ink or glue.

Packages must be free of foreign matter in accordance with the table of tolerances in Section "IV Provisions concerning tolerances".

VI. Provisions concerning marking

Each package⁴ must bear the following particulars in letters grouped on the same side, legibly and indelibly marked and visible from the outside:

A. Identification

Packer and/or Dispatcher: Name and physical address (e.g. street/city/region/postal code and, if different from the country of origin, the country) or a code mark officially recognized by the national authority⁵.

B. Nature of produce

- “Inshell Pistachio Nuts”
- Name of the variety or commercial type (optional).

C. Origin of produce

- Country of origin and optionally, district where grown or national, regional or local place name.

D. Commercial specifications

- Class;
- Size (if sized) expressed by:
 - The minimum and maximum diameters, or
 - The minimum diameter followed by the words “and above” or “and +”;
- Crop year (optional)
- “Best before” followed by the date (optional)

E. Official control mark (optional)

Revised 20---`

⁴ Package units of produce pre-packed for direct sale to the consumer shall not be subject to these marking provisions but shall conform to national requirements. However the markings referred to shall in any event be shown on the transport packaging containing such package units

⁵ The national legislation of a number of European countries requires the explicit declaration of the name and address.
